FOREWORD

I am happy to introduce the Standards Catalogue 2018 of BSTI. It contains more than 4000 national standards of Bangladesh that are now in vogue.

In fact formulation, amendment and revision of national standards is a continuous process which is done by the Committees of BSTI. The committees consist of persons drawn from professionals, scientists and technical experts of high standing. BSTI provides only the secretarial services. Currently, 2 (two) National Committees, 6 (Six) Divisional Committees and 73 (seventy three) Sectional (Technical) Committees are working on standards formulation.

Product standards are now required to be set not only for its own domestic market but the eyes are also kept open to accommodate the fast changing and often fastidious consumer preference, market dynamics and exigencies prevailing in the global market. Failure to respond to these paradigms would not only push the product out of market but will also jeopardize the credibility and good will of the product's country of origin.

Currently, 166 products are under the compulsory Certification Marks (CM) scheme of BSTI which in other words means that marketing of any of these items needs conformity certificate of Bangladesh Standard from the BSTI. These include Food and Agriculture, Chemical, Jute and Textile, Electrical and Electronics and Engineering products. With the launching of BSTI website, the institution is now contemplating to insert as much information related to standards as possible in its website for the clientele at home and abroad.

I thank my colleagues for their untiring efforts without which this publication would not have seen the light of the day.

We hope that the users will find the catalogue helpful.
